

Eagle business products

**Cut print procurement costs.
Save time. Increase control.
Reduce errors.**

All with just a web browser.

The PrintCommerce eCatalog service provides a custom catalog of your company's printed material so you can create and place printing orders online.

Get online with the PrintCommerce system from Collabria, the premier e-business solution for the printing industry, brought to you by **Eagle Business Products**.

E-PROCUREMENT MADE SIMPLE

Using the power of the Internet, *PrintCommerce eCatalog™* automates the entire print procurement process. Order creation, job tracking, proofing, approvals, and billing are all done online, from anywhere, at anytime.

Proven with hundreds of corporate customers, eCatalog is easy to implement and easy to use. It works through standard Web browsers, via any Internet connection. No special software is required for access.

Because it is a service, the PrintCommerce eCatalog system can be deployed in weeks, not months or years, without the cost and time associated with typical enterprise software installations.

SAVES TIME AND MONEY

Ordering items and obtaining information is fast and easy through eCatalog's secure self-service design. The eCatalog system empowers employees to order and customize forms, stationery, marketing collateral, business cards and more, without wasting time with paper forms or catalogs.

Items can be found quickly and easily in your company's personalized online eCatalog. Orders can then be modified in real time and proofed online; employees can access order status anytime. Instead of waiting for paper routing, approvals are completed in seconds and routed online — drastically reducing cycle times.

STREAMLINES YOUR PROCESS

The eCatalog system automates the entire procurement process, including analysis, selection, ordering, administration, tracking, and payment. Requisitions and purchase orders are routed electronically, eliminating the need for inefficient paper-based requests, approvals, and reporting.

Whether the print order is fulfilled from inventory or printed on demand, the result is a simplified print procurement process that reduces the turnaround time from order to delivery.

The PrintCommerce eCatalog system integrates with your existing business systems and databases to seamlessly enhance your productivity and profitability.

Your PrintCommerce eCatalog site creates a direct link to your preferred printing provider. Online ordering options include items with fixed content or customized documents with variable data.

Online, soft proofs add to your options to help streamline production workflows.

The eCatalog system provides complete tracking and reporting with real time access to print requisitions, purchase orders, and work-in-process. Sort by purchase order number, order date, cost center, or print item.

INCREASES PROCUREMENT CONTROL

The eCatalog system allows you to decentralize purchasing while maintaining centralized control, helping to prevent employees from purchasing items outside company-wide print agreements.

By creating an online eCatalog with **Eagle Business Products**, you ensure that your company-wide agreements are used every time an item is purchased — greatly reducing off-contract buying. Furthermore, eCatalog enforces your company workflows and approvals so that only authorized orders are processed.

ORDER FROM YOUR ONLINE eCATALOG

- Your own unique online eCatalog, with digital masters of all printed material.
- eCatalog supports any printed piece, including business cards, stationery, forms, collateral, manuals, and promotional items.
- Each print item includes an onscreen picture to prevent ordering errors.
- Items in the catalog can be printed on demand, picked from inventory, or customized with variable content.
- eCatalogs are secure and accessible only by authorized personnel. Access levels can be customized to each employee or group.
- Catalogs are accessible from any standard Microsoft or Netscape browser over the Internet or corporate Intranet, anytime, from anywhere.

SECURE AND FLEXIBLE

- Digital masters of your company's print items are stored in a secure database.
- Digital masters enforce what content is variable (e.g., employee name) and what must remain consistent (e.g., corporate identity standards).
- Online proofing ensures the document is correct prior to releasing it for printing.
- The completed print item can be routed for commercial printing, digital printing, or downloaded and printed to a laser, inkjet, or other office printer.

FAST, AUTOMATED APPROVALS

Your company's unique procurement business rules are applied and enforced with the eCatalog system. Purchase orders can be automatically generated and routed for approval. The approval process is streamlined and less error prone.

Only authorized employees can access the system and approve purchase orders, reducing maverick purchasing.

MEETS TODAY'S NEEDS - AND TOMORROW'S

PrintCommerce eCatalog scales to handle large, enterprise-level volumes of procurement transactions. Powerful servers guarantee 24/7 reliability, full backup, and security against outside intrusion. The system supports the latest open Internet and e-commerce standards.
